

Welsh Language & Culture Strategy - Background

This strategy has been prepared by Itec Training Solutions Ltd (Itec), with the aim to promote the benefits and importance of the Welsh language and culture to all its learners, and to facilitate the use of the language in Itec delivery across all programmes.

Objectives

Itecs strategy is communicated through its Welsh Pledge, and is broken down into 7 key learner objectives:

Measuring Success

Monitoring and evaluating the activities will be key to ensuring the long-term success and sustainability of this strategy, and this must be an essential element of the Action Plan. The results of the annual self-assessment review will be compared to the target set and will include:

- To what extent we have followed the strategy and have reached the objectives set
- An assessment containing the following information -
 - 1) the number of Welsh speakers in delivery, the language skill and the qualification achievement in Welsh
 - 2) a list of activities that were arranged or funded during the previous year in order to promote the use of the Welsh language and its impact on the learner.
